Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

3. The problem addressed by the present invention can thus be seen as that of ensuring that the child seat offers the same level of seating comfort when facing in or against the direction of travel, irrespective of the angle of inclination of the vehicle seat base.

The solution proposed in claim 1 of the application involves an inventive step (PCT Article 33(3)) because the angle-correcting wedge element is adjustable along a guide on the base element of the child seat.

4. Claims 2 to 4 are dependent on claim 1 and therefore also meet the PCT requirements in respect of novelty and inventive step.
